

English-Language Arts and Reading Assessments

Thank you for subscribing to our Pennington Publishing newsletter. As our get-acquainted gift, following are accurate and teachable diagnostic grammar and usage, mechanics, spelling, and reading assessments with corresponding recording matrices to help teachers determine *what students know* and *what they do not know*.

Each assessment is comprehensive, not a random sample, to enable teachers to teach to the results of each test item. The author's ELA and reading intervention programs provide the resources for assessment-based whole class and individualized instruction.
