

You can make a difference in your students' spelling. It's not too late!

Use this comprehensive diagnostic assessment to pinpoint all sound-spelling patterns learned from kindergarten through eighth grade. This 102 item test pinpoints spelling deficits and allows the teacher to individualize instruction according to the assessment-data.

[Spelling Patterns Assessment Matrix](#)

Differentiated Spelling Instruction is a complete grade-level (4, 5, 6, 7, and 8) spelling program built upon spelling patterns, not silly vocabulary word lists. Students take weekly tests and complete spelling sorts for each lesson. Quick and effective!

"I work with a large ELL population at my school and was not happy with the weekly spelling tests, etc. Through my research in best practices, I know that spelling patterns and word study are so important at this age group. However, I just couldn't find anything out there that combines the two. We have just adopted RtI at my school and your spelling matrix is a great tool for documentation. The grade level spelling program and remediation are perfect for my students."

Heidi

Students complete **targeted worksheets** corresponding to the spelling patterns they missed on the diagnostic assessment. Each worksheet explains the spelling pattern, provides examples, includes a spelling sort, has a word jumble, rhyme, and/or book search, and includes a short formative assessment to determine whether or not the student has mastered the spelling pattern. Students self-correct the worksheet to learn from their mistakes, complete the formative assessment, and mini-conference with the teacher, who corrects the formative assessment to determine mastery. If mastered, the teacher marks as such on the **progress monitoring matrix**.

Now that's effective differentiated instruction! Your students can *catch up*, while they *keep up* with grade-level spelling instruction.
