## Guided Reading Phonics Books

- ✓ 54 illustrated guided reading books with running records
- ✓ Decodable text with sight words, word fluency timings, comprehension questions

## Sight Syllables Assessment

---

The purpose of this whole-class assessment is to determine which common Greek and Latin affixes (prefixes and suffixes) students can and cannot accurately read. The assessment consists of the 49 most frequently used prefixes and the 37 most frequently used suffixes. These affixes should be memorized as *sight syllables*, because one-third of these commonly used word parts are not phonetically regular.

### Directions

Pass out the **Sight Syllables Assessment** to students. Say—“This is a short test to see if you can identify real words. On your test, find the first two words’ labeled A and B [Pause]. One of the words is a real word; the other is not. Write the letter which identifies the real word in the space to the left of each number.”

Once the assessments have been scored using the Teacher Answer Key, the number of unmastered sight syllables should be recorded in the Sight Syllables Pre-test column on the **Phonemic Awareness, Phonics, Sight Words, and Fluency Mastery Matrix** for each student.
