Diagnostic Spelling Assessment

Preparation, Administration, Correction, and Recording

The purpose of this assessment is to determine which of the common spelling patterns students have and have not been mastered. The multi-syllabic words prevent students from identifying the words by “sight spellings” and require recognition of the sound-spelling patterns within the context of syllables.

Preparation

Pass out binder paper and pencils. Model how to number the test items on the board to facilitate correction, and tell students to number accordingly.

Administration

To read the directions, say—

“This is a test to see if you can accurately spell the words I say out loud. I will first say the spelling word; then repeat it; then use it in a sentence; and then repeat the spelling word once more. Listen carefully because I won’t repeat the words after the test is finished. Please print the spelling words.”

Now dictate the spelling word, the example sentence, and the word again. Don’t elongate the vowel or consonant sounds to emphasize spellings. Keep a consistent pace of about seven seconds per test item. Any longer and students will lose their place or begin daydreaming. Since this is a long test, teachers may elect to take a short stretch break in the middle of the test administration.

Correction

Grade the assessment, marking only the specified sound-spelling pattern for each word. In other words don’t mark the word wrong because of other spelling errors in the word. For example, if the sound-spelling pattern is Long /a/ “__ay” and the word is “payment,” the student spelling of “paiment” would be wrong, but “paymunt” would be right. This selective grading isolates the sound-spelling pattern problem areas for each student.

Recording the Data

Write down the names of your students in alphabetical order on the Diagnostic Spelling Assessment Mastery Matrix. Record a slash (/) for each sound-spelling error. Leave the box blank for each correctly spelled sound-spelling.
